RISK REGISTER

Project Name	INTRODUCTION TO Supply chain MANAGEMENT

#	Risk	Risk Description	Prob	Imp	Risk Score	Risk Response Type	Risk Response Plan	Contingency Plan
1	Going Over Budget	Costs may rise if we add more features or make big changes.	0.5	10	5.0	Avoid	Define clear scope and requirements before development begins.	Focus on the most important features and add extras later if possible.
2	Team Member Gets Sick	If someone is unwell, it can delay the work.	0.5	10	5.0	Mitigate	Encourage rest and balance to keep everyone healthy.	Share tasks among team or have someone ready to fill in if needed.
3	Poor Code Quality	Bad coding could lead to bugs and delays.	0.8	5	4.0	Mitigate	Review code regularly and test often.	Keep extra time to fix issues before release.
4	Internet Issues	Poor connection due to bad weather.	0.5	8	4.0	Avoid	Ask everyone to have a strong internet connection.	Use mobile data or switch to another place if needed.
5	Missing Meetings	Not being able to attend meetings due to any reason.	0.5	8	4.0	Avoid	Schedule meetings in advance and send reminders.	Record meetings and share notes with everyone.
6	Late Feature Completion	Some parts of the app might not be ready on time.	0.5	5	2.5	Avoid	Set small goals with clear deadlines.	Work on the most needed features first and save others for later.
7	User not using the App	After launching, people may not use the app as expected.	0.5	2	1.0	Mitigate	Make the app fun and useful with reminders and rewards.	Collect feedback and update the app to fit user needs.
	Design Misunderstanding	The app might not look or work the way we planned due to confusion.	0.5	5	2.5	Mitigate	Share clear designs and get feedback early.	Update the design based on team or user suggestions.
	App store rejection	App might get rejected due to store rules or missing info.	0.2	5	1.0	Mitigate	Follow app store guidelines closely before submitting.	Fix issues quickly and resubmit.
	Data Privacy Issue	Users' data might not be handled safely, causing trust problems	0.5	5	2.5	Mitigate	Use safe storage methods and follow privacy rules.	Add privacy policy and fix any data handling problems fast.
